This book is the international edition of the proceedings of IS-Seoul 2011, the Fifth International Symposium on Deformation Characteristics of Geomaterials, held in Seoul, South Korea, in September 2011. The book includes 7 invited lectures, as well as 158 technical papers selected from the 182 submitted. The symposium explored ideas about the complex load-deformation response in geomaterials, including laboratory methods for small and large strains; anisotropy and localization; time-dependent responses in soils; characteristics of treated, unsaturated, and natural geomaterials; applications in field methods; evaluation of field performance in geotechnical structures; and physical and numerical modeling in geomechanics. These topics were grouped under a number of main themes, including experimental investigations from very small strains to beyond failure; behavior, characterization and modeling of various geomaterials; and practical prediction and interpretation of ground response: field observation and case histories. Both the symposium and this book represent an important contribution to the exchange of advanced knowledge and ideas in geotechnical engineering and promote partnership among participants worldwide.

IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields.

Some of the areas we publish in:

- Biomedicine
- Oncology
- Artificial intelligence
- Databases and information systems
- Maritime engineering
- Nanotechnology
- Geoengineering
- All aspects of physics
- E-governance
- E-commerce
- The knowledge economy
- Urban studies
- Arms control
- Understanding and responding to terrorism
- Medical informatics
- Computer Sciences

**From reader reviews:**

**Carson McDonald:**

The book Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea can give more knowledge and information about everything you want. Exactly why must we leave a very important thing like a book Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea? Several of you have a different opinion about guide. But one aim this book can give many information for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or details that you take for that, you could give for each other; you can share all of these. Book Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

**Cheryl Estrella:**

A lot of people always spent their free time to vacation or even go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. If you need to try to find a new activity that is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent the entire day to reading a guide. The book Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea it is very good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In case you did not have enough space to create this book you can buy the particular e-book. You can more easily to read this book from your smart phone. The price is not to cover but this book offers high quality.

**Winford Patterson:**

Playing with family within a park, coming to see the coastal world or hanging out with friends is thing that usually you have done when you have spare time, after that why you don't try thing that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea, you may enjoy both. It is excellent combination right, you still desire to miss it? What kind of hangout type is it? Oh occur its mind hangout guys. What? Still don't understand it, oh come on its named reading friends.

**Kathy Donnelly:**

Many people spending their time frame by playing outside along with friends, fun activity with family or just watching TV all day long. You can have new activity to enjoy your whole day by reading through a book. Ugh, think reading a book can actually hard because you have to accept the book everywhere? It okay you can have the e-book, getting everywhere you want in your Mobile phone. Like Deformation Characteristics of Geomaterials: Proceedings of the Fifth International Symposium on Deformation Characteristics of Geomaterials, IS-Seoul 2011, 1-3 September 2011, Seoul, Korea which is finding the e-book version. So , try out this book? Let's view.
