Education, Work and Identity: Themes and Perspectives Michael Tomlinson

Education, Work and Identity explores changing patterns of education and work, the dynamic relationship between these two institutions, and the wider social and economic contexts shaping them. It locates this in processes of social and economic change, in particular the shift towards globalization and the post-industrial economy.

The book examines how these changes have reshaped individuals' educational, transitional and labour market experiences. It also explores key themes and approaches in understanding the education and labour market interplay, and the way in which education and work institutions shape people's orientations and identities around work.
