Stochastics of Environmental and Financial Economics: Centre of Advanced Study, Oslo, Norway, 2014-2015 (Springer Proceedings in Mathematics & Statistics)

These Proceedings offer a selection of peer-reviewed research and survey papers by some of the foremost international researchers in the fields of finance, energy, stochastics and risk, who present their latest findings on topical problems. The papers cover the areas of *stochastic modeling* in energy and financial markets; *risk management* with environmental factors from a stochastic control perspective; and *valuation and hedging of derivatives* in markets dominated by renewables, all of which further develop the theory of stochastic analysis and mathematical finance. The papers were presented at the first conference on “Stochastics of Environmental and Financial Economics (SEFE)”, being part of the activity in the SEFE research group of the Centre of Advanced Study (CAS) at the Academy of Sciences in Oslo, Norway during the 2014/2015 academic year.
