How the World is Made: The Story of Creation According to Sacred Geometry John Michell, Allan Brown

Galileo described the universe as a large book written in the language of mathematics, which can only be read by those with knowledge of its characters triangles, circles and other geometrical figures. In "How the World Is Made", John Michell explains how ancient peoples who grasped the timeless principles of sacred geometry were able to create flourishing societies. His more than 300 colour illustrations reveal the secret code within these geometrical figures and how they express the spiritual meanings in the key numbers of 1 through 12. He identifies the various regular shapes and shows their constructions; their natural symbolism; their meetings, matings and ways of breeding; and, their functions within the universal order. In the process, Michell helps us see the world in a new light. Disparate shapes and their corresponding numbers are woven together, resolving themselves into an all-inclusive world image that pattern in the heavens, as Socrates called it, which anyone can find and establish within themselves.
