Runner has a problem. He and 499,000 men and women are trapped in a game. He also just happens to be the only person from IT who could log everyone out safely. And he doesn't remember his password.

He, like everyone else in this nightmare, had their memories scrambled or lost in the process of being loaded into the game. A single garbled message is his only clue on how to save everyone.

The problem is that whoever loaded them into the game, loaded their minds completely. If they die, their brain gets wiped.

Now it's time for Runner to flex his skills as a power gaming min maxer and see what he can do. Because every time he levels, he might gain the memory of the password. Time to go Hardcore.
