Structure and Bonding: RSC (Tutorial Chemistry Texts)

Jack Barrett

Structure and Bonding: RSC (Tutorial Chemistry Texts) Jack Barrett

Structure and Bonding covers introductory atomic and molecular theory as given in first and second year undergraduate courses at university level. This book explains in non-mathematical terms where possible, the factors that govern covalent bond formation, the lengths and strengths of bonds and molecular shapes. Throughout the book, theoretical concepts and experimental evidence are integrated. An introductory chapter summarizes the principles on which the Periodic Table is established, and describes the periodicity of various atomic properties which are relevant to chemical bonding. Symmetry and group theory are introduced to serve as the basis of all molecular orbital treatments of molecules. This basis is then applied to a variety of covalent molecules with discussions of bond lengths and angles and hence molecular shapes. Extensive comparisons of valence bond theory and VSEPR theory with molecular orbital theory are included. Metallic bonding is related to electrical conduction and semi-conduction. The energetics of ionic bond formation and the transition from ionic to covalent bonding is also covered. Ideal for the needs of undergraduate chemistry students, Tutorial Chemistry Texts is a major series consisting of short, single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses. Each book provides a concise account of the basic principles underlying a given subject, embodying an independent-learning philosophy and including worked examples.

From reader reviews:

Olga Harrington:

Do you one of people who can't read enjoyable if the sentence chained from the straightway, hold on guys that aren't like that. This Structure and Bonding: RSC (Tutorial Chemistry Texts) book is readable through you who hate the straight word style. You will find the info here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to deliver to you. The writer connected with Structure and Bonding: RSC (Tutorial Chemistry Texts) content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different by means of it. So , do you nonetheless thinking Structure and Bonding: RSC (Tutorial Chemistry Texts) is not loveable to be your top list reading book?

Marjorie Wright:

Don't be worry when you are afraid that this book can filled the space in your house, you could have it in e-book technique, more simple and reachable. This kind of Structure and Bonding: RSC (Tutorial Chemistry Texts) can give you a lot of good friends because by you checking out this one book you have factor that they don't and make you more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't realize, by knowing more than some other make you to be great individuals. So , why hesitate? Let us have Structure and Bonding: RSC (Tutorial Chemistry Texts).

Carl Carrillo:

That e-book can make you to feel relax. This particular book Structure and Bonding: RSC (Tutorial Chemistry Texts) was vibrant and of course has pictures on the website. As we know that book Structure and Bonding: RSC (Tutorial Chemistry Texts) has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you and try to like reading in which.

Mamie Donnelly:

As a university student exactly feel bored to be able to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart or real their interest. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Structure and Bonding: RSC (Tutorial Chemistry Texts) can make you feel more interested to read.
