## **Military Intelligence and Software Engineering: A Tale of Two Oxymorons** Mark Tinghino

Murphy's law would appear to apply quite well to software on the World Wide Web and on people's personal devices. There are reasons for that universal experience. Mr. Tinghino has distilled nearly 3 decades of experience in the software development field to educate a general audience on the challenges in producing software apps that are defect free. He explains how software products are different from other types of products, and he provides a general introduction to basic concepts in software engineering. He also describes his vision for the future of software in his concluding chapter.
