Pattern Recognition and Classification: An Introduction

Geoff Dougherty

Pattern Recognition and Classification: An Introduction Geoff Dougherty

The use of pattern recognition and classification is fundamental to many of the automated electronic systems in use today. However, despite the existence of a number of notable books in the field, the subject remains very challenging, especially for the beginner.

Pattern Recognition and Classification presents a comprehensive introduction to the core concepts involved in automated pattern recognition. It is designed to be accessible to newcomers from varied backgrounds, but it will also be useful to researchers and professionals in image and signal processing and analysis, and in computer vision. Fundamental concepts of supervised and unsupervised classification are presented in an informal, rather than axiomatic, treatment so that the reader can quickly acquire the necessary background for applying the concepts to real problems. More advanced topics, such as semi-supervised classification, combining clustering algorithms and relevance feedback are addressed in the later chapters.

This book is suitable for undergraduates and graduates studying pattern recognition and machine learning.

From reader reviews:

Guadalupe Eggleston:

In this 21st centuries, people become competitive in every single way. By being competitive today, people have do something to make all of them survives, being in the middle of the crowded place and notice through surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yep, by reading a reserve your ability to survive improve then having chance to stay than other is high. To suit your needs who want to start reading some sort of book, we give you this Pattern Recognition and Classification: An Introduction book as beginner and daily reading e-book. Why, because this book is greater than just a book.

Roy Hanson:

Reading a publication can be one of a lot of task that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people like it. First reading a book will give you a lot of new details. When you read a guide you will get new information because book is one of a number of ways to share the information as well as their idea. Second, reading through a book will make a person more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other people. When you read this Pattern Recognition and Classification: An Introduction, it is possible to tells your family, friends along with soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a guide.

Lauren Zavala:

Spent a free time for you to be fun activity to do! A lot of people spent their sparetime with their family, or all their friends. Usually they doing activity like watching television, about to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Could possibly be reading a book can be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the reserve untitled Pattern Recognition and Classification: An Introduction can be great book to read. May be it may be best activity to you.

Ida Acord:

That publication can make you to feel relax. This kind of book Pattern Recognition and Classification: An Introduction was bright colored and of course has pictures on the website. As we know that book Pattern Recognition and Classification: An Introduction has many kinds or genre. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that will.
