A vital tool for researchers, engineers, and students, *New Sensors and Processing Chain* focuses on the processing chain to set up in order to extract relevant information on various systems. Highlighting the design of new microsenors and various applications, the authors present recent progress in instrumentation and microsystem design, providing insight to the modification of the sensor itself as well as its environment. Various applications illustrate the presentations, which show how a processing chain is organized from the data acquired by a specific sensor.
