## **What Price Better Health?: Hazards of the Research Imperative (California/Milbank Books on Health and the Public)** Daniel Callahan

The idea that we have an unlimited moral imperative to pursue medical research is deeply rooted in American society and medicine. In this provocative work, Daniel Callahan exposes the ways in which such a seemingly high and humane ideal can be corrupted and distorted into a harmful practice.

Medical research, with its power to attract money and political support, and its promise of cures for a wide range of medical burdens, has good and bad sides—which are often indistinguishable. In *What Price Better Health?*, Callahan teases out the distinctions and differences, revealing the difficulties that result when the research imperative is suffused with excessive zeal, adulterated by the profit motive, or used to justify cutting moral corners. Exploring the National Institutes of Health's annual budget, the inflated estimates of health care cost savings that result from research, the high prices charged by drug companies, the use and misuse of human subjects for medical testing, and the controversies surrounding human cloning and stem cell research, Callahan clarifies the fine line between doing good and doing harm in the name of medical progress. His work shows that medical research must be understood in light of other social and economic needs and how even the research imperative, dedicated to the highest human good, has its limits.

Hello Mr. and Mrs. busy do you still doubt in which?

**Casey Reeves:**

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this What Price Better Health?: Hazards of the Research Imperative (California/Milbank Books on Health and the Public) can make you experience more interested to read.
